OPERATION

TURNING THE MIRROR ON/OFF FOR THE FIRST TIME

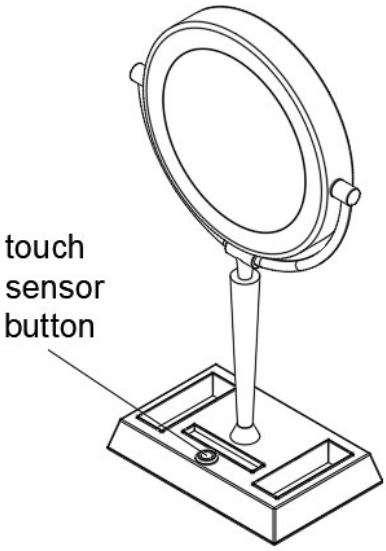
- When operating your mirror after taking it out of the box, use the included charging cable to begin charging your new mirror. Use a 5V wall adapter along with the charging cable to charge the mirror. If the battery is completely depleted, it will take about 3-4 hours to charge the mirror. The mirror will still charge even if being used while it is charging.
- To turn the mirror on, lightly tap the touch sensor button located on the top of the mirror base.
- To turn your mirror OFF, repeatedly tap the touch sensor button until all the remaining color temperature settings have been cycled through. The mirror will turn OFF when the touch sensor button is tapped while the mirror is on the final color temperature setting.

CHANGING THE COLOR TEMPERATURE

- The Sunter 1x/10x Tapered LED Vanity Mirror features 3 lighting temperature settings: Warm (3,000), Indoor (4,000 K), and Natural Daylight (6,000 K).
- To adjust the lighting temperature for the
- mirror, follow these steps:
- Turn the mirror ON by tapping the touch sensor button.
- Once the mirror illuminates, tap the touch sensor button to change lighting temperatures. Tapping the touch sensor button after the 3rd lighting temperature setting will turn the mirror OFF.

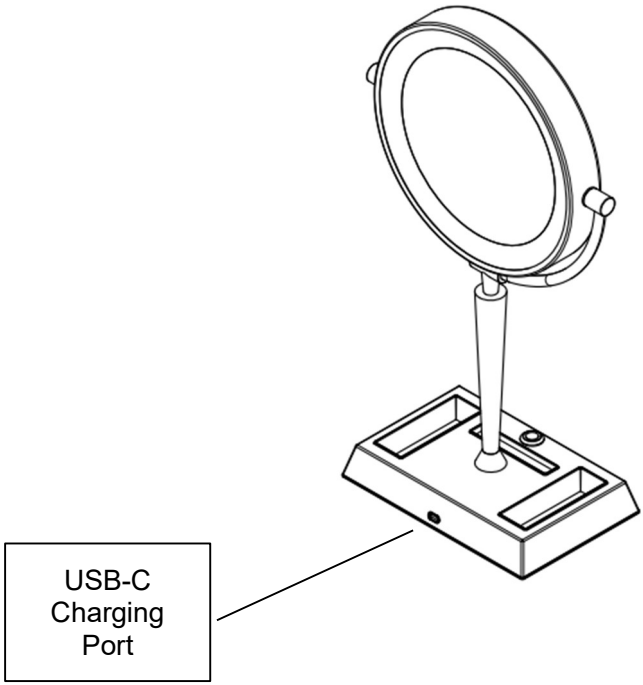
ADJUSTING THE BRIGHTNESS

- In addition to the adjustable lighting temperature, the Sunter 1x/10x Tapered LED Vanity Mirror also features adjustable brightness.
- To adjust brightness, first, choose 1 of the lighting color temperature settings by pressing the touch sensor one, two, or three times. Once you have found the temperature you would like, you can now adjust the brightness accordingly.
- To decrease the brightness, once the desired lighting temperature setting has been selected, tap and hold your finger on the touch sensor button – this will gradually decrease the brightness of the mirror light. Lift your finger when the desired level of brightness appears.
- To increase the brightness, tap and hold the touch sensor button until you notice the brightness decrease. Once you notice the brightness decrease, lift your finger off the touch sensor button and then immediately tap and hold the touch sensor button again – this step will increase the brightness of the light. Lift your finger when the desired level of brightness appears.



CHARGING YOUR MIRROR

- Your mirror includes a USB/USB-C charging cable. Use a 5V wall adapter to charge the vanity mirror. If the battery is fully depleted, the mirror will need to charge for 3-4 hours.
- To turn the mirror on, lightly tap the touch sensor button located on the top of the mirror base.
- To turn your mirror OFF, repeatedly tap the touch sensor button until all the remaining color temperature settings have been cycled through. The mirror will turn OFF when the touch sensor button is tapped while the mirror is on the final color temperature setting.
- The blue light surrounding the touch sensor button will slowly flash when the mirror is charging. When fully charged, the blue light will stop flashing. If the battery charge is less than 10%, the blue light will flash rapidly.
- Your mirror will charge while it is in use if connected to the charging cable and a wall adapter.
- Run times
    - On a full charge and the highest brightness setting, the mirror will operate on battery power for up to 2.5 hours
    - On a full charge and 10% brightness, the mirror will operate on battery power for up to 6 hours



WARNINGS

TO REDUCE THE RISK OF BURNS, ELECTROCUTION, FIRE, OR INJURY TO PERSONS:

- DO NOT expose the mirror to heat or liquid.
- DO NOT attempt to disassemble the mirror.
- DO NOT PUT INTO DIRECT SUNLIGHT. Be sure mirror is not in a position where it can reflect sunlight; reflected sunlight can cause fire
- Close supervision is necessary when the lighted vanity mirror is used by or near children or disabled persons
- DO NOT USE OUTDOORS
- Use the vanity mirror only for its intended purpose as described in these instructions DO NOT use attachments not recommended by the manufacturer
- DO NOT operate where aerosol (spray) products are being used or where oxygen is being administered
- DO NOT submerse or operate near water
- Never operate the vanity mirror if the battery, or charging cord are damaged
- DO NOT operate the vanity mirror if it has been dropped, damaged, or dropped into water. Return the vanity mirror to a service center for examination or repair. No repairs should be attempted by the consumer
- Keep the charging cord and mirror away from heated surfaces

CLEANING YOUR MIRROR

- Unplug your mirror and turn the mirror off.
- Use a soft damp cloth to clean your mirror
- Allow the mirror to fully dry prior to plugging the mirror back into the charger and turning the mirror on.

FOR HOUSEHOLD USE ONLY SAVE THESE INSTRUCTIONS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This Class B digital apparatus complies with Canadian ICES-005.

TROUBLESHOOTING GUIDE

PROBLEM	SOLUTION
The mirror light will not turn on	• If the blue light on the top of the mirror base does not illuminate, your mirror's battery may lack enough charge to power the mirror – plug the mirror into a 5V wall adapter using the charging cable. Your mirror can be used while it is charging. The mirror's battery will take about 3-4 hours to fully charge. • If the mirror's light still will not turn on after following these steps, please contact Blackstone International's customer service

If the mirror's light still will not turn on after following these steps, please contact Blackstone International's customer service.

WARRANTY: This vanity mirror includes a one (1) year warranty, which covers manufacturer defects and workmanship under normal use. Proof of purchase is required. A dated sales receipt constitutes proof of purchase. This warranty is void if the mirror has been subject to abuse such as: being dropped which could result in damage, etc.; immersion in or exposure to water; exposure to excessive heat, outdoor usage, any use other than household use; disassembly, repair or alteration by anyone other than an authorized service provider; use on improper voltage or current; or any use contrary to the user instructions. To receive coverage under this warranty, contact customer service for consultation and/or replacement. DO NOT attempt to repair any electrical or mechanical functions of this product; doing so will void this warranty.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
