

Cascade 40" Tower Fan Assembly Guide:

PARTS LIST

A) Fan Body

B) Base Front C) Base Back

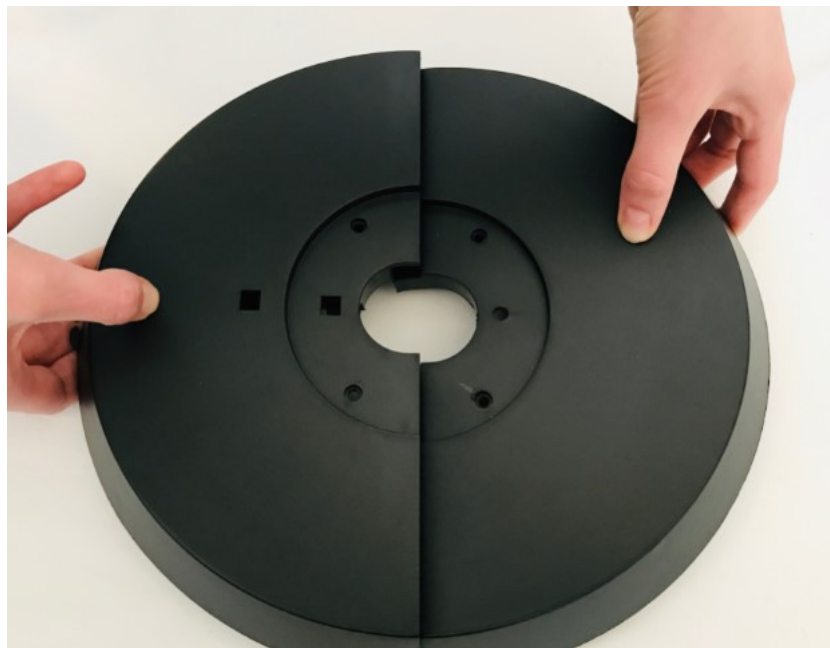

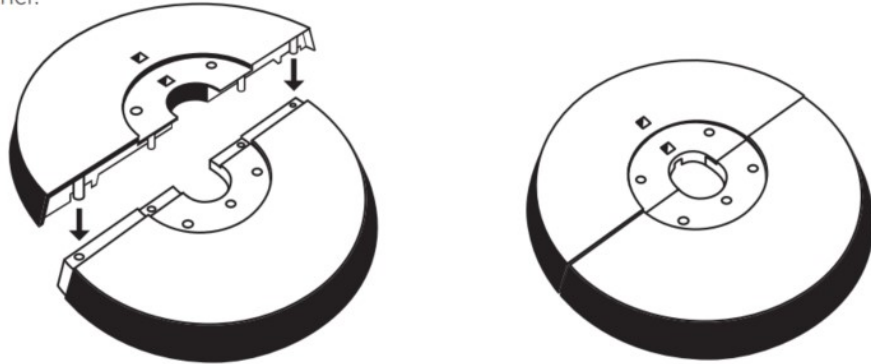

D) 4X Fan Screws

E) Remote Control

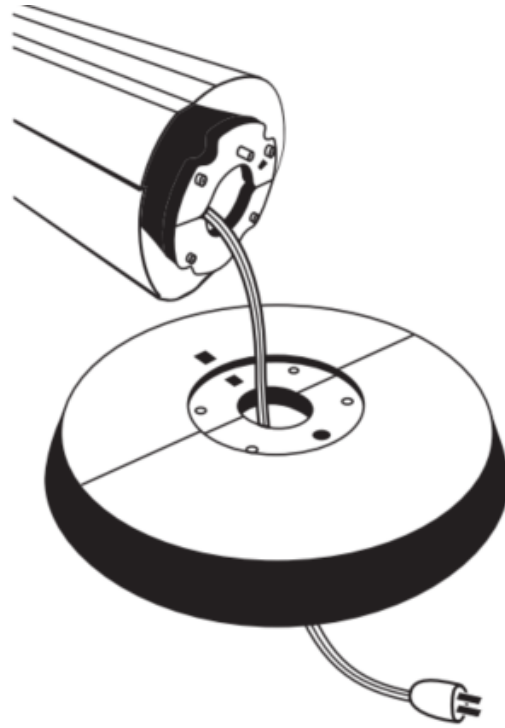

Step 1:

Your tower fan base is composed of two pieces (BASE FRONT and BASE BACK). The base needs to be connected together prior to attaching it to the tower fan. Align, and then insert, the plastic pegs of the BASE TOP with the holes on the BASE BOTTOM until both pieces snap together.

Step 2:

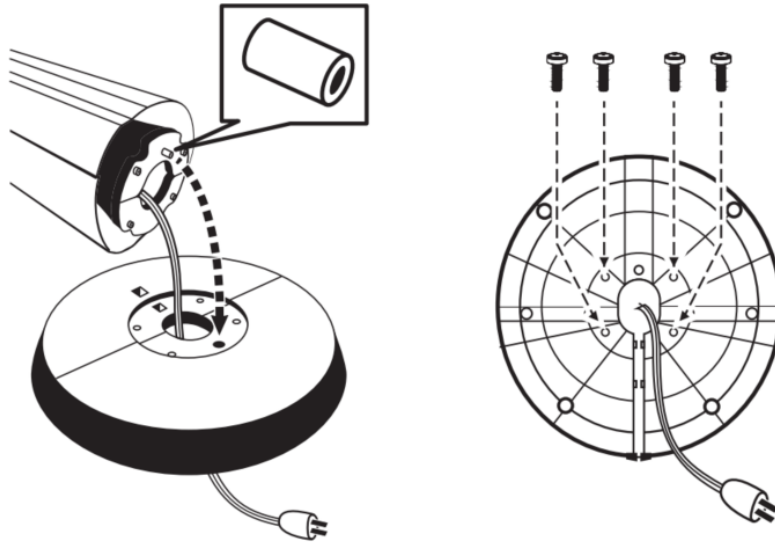

Now that the base is connected together, turn the tower fan upside down and thread the tower fan's power cord through the hole in the middle of the base.

Step 3:

Step 3

Next, align the base mount guide peg with the guide hole located on the base. The base will only fit onto the tower fan one way. Once the base is properly aligned on the bottom of the tower fan, insert and tighten the 4 screws to secure the base to the tower fan.

Step 4:

Step 4

Thread the power cord into the guide on the bottom of the base by gently pressing the wire into the clamps. Your tower fan is now ready for use.
